-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by [www.usafutures.com](http://www.usafutures.com).

[www.usafutures.com](http://www.usafutures.com), dated 1/25/99 as shown by archive.org, shows an online brokerage firm. (see online trading in directory). The “hedging – soybeans example”, found in the directory, explains the use of the futures market in the agricultural market. A futures contract includes the type of commodity, the quantity and a price, which is equal to the local cash bid or flat price and a basis price. (this is in the memory) The online brokerage (having first computing sub-system) receives electronic request from clients. (some clients are intermediaries) [www.usafutures.com](http://www.usafutures.com) has communications with the commodities exchange. (second sub-system) The system has a web page and each account holder or client would have access specific to their own account. (third sub-system) From the example, it is clear that a producer of an agricultural commodity would be a client and therefore could be received at the website. The determination or calculation of a flat price is an inherent feature of agricultural price structure. A broker would be well aware of this old and well-known simple mathematical relation. The hedging process (fourth sub-system) described is where the broker

(acting on behalf of a client) obtains future contracts in order to reduce price risk when a client is prepared to trade in the actual commodity. Online brokers have real time commodity pricing, which is on their websites, show in graphs and tables (correlating).

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. "Grain Price Hedging Basics" and [www.foodmarketexchange.com](http://www.foodmarketexchange.com) show systems of interest.
